On August 24, 2017, Axalta Coating Systems Ltd. (“Axalta”) posted presentation slides to Axalta’s Investor Relations website (<http://ir.axaltacs.com>), which will be presented at several upcoming investor presentations. A copy of the presentation materials is furnished hereto as Exhibit 99.1.

The information contained herein and in the accompanying exhibits shall not be deemed filed for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liability of that section, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, except as shall be expressly set forth by specific reference in such a filing.

In the presentation slides and prepared remarks during the upcoming investor presentations, Axalta presents, and will present, certain non-GAAP financial measures. Axalta management believes that presenting these non-GAAP financial measures provides meaningful information to investors in understanding operating results and may enhance investors’ ability to analyze financial and business trends. In addition, Axalta management believes that these non-GAAP financial measures allow investors to compare period to period more easily by excluding items that could have a disproportionately negative or positive impact on results in any particular period. Non-GAAP measures are not a substitute for GAAP measures and should be considered together with the GAAP financial measures. As calculated, our non-GAAP financial measures may not be comparable to other similarly titled measures of other companies.

Forward-Looking Statements

This presentation and the oral remarks made in connection herewith may contain "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, including those relating to 2017 financial projections, including execution on our 2017 goals as well as 2017 net sales, net sales excluding FX, Adjusted EBITDA, interest expense, tax rate, as adjusted, free cash flow, capital expenditures, depreciation and amortization, diluted shares outstanding, cost savings, contributions from acquisitions, raw material cost increases, and related assumptions. Any forward-looking statements involve risks, uncertainties and assumptions. These statements often include words such as "believe," "expect," "anticipate," "intend," "plan," "estimate," "target," "project," "forecast," "seek," "will," "may," "should," "could," "would," or similar expressions. These statements are based on certain assumptions that we have made in light of our experience in the industry and our perceptions of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances as of the date hereof. Although we believe that the assumptions and analysis underlying these statements are reasonable as of the date hereof, investors are cautioned not to place undue reliance on these statements. We do not have any obligation to and do not intend to update any forward-looking statements included herein, which speak only as of the date hereof. You should understand that these statements are not guarantees of future performance or results. Actual results could differ materially from those described in any forward-looking statements contained herein or the oral remarks made in connection herewith as a result of a variety of factors, including known and unknown risks and uncertainties, many of which are beyond our control including, but not limited to, the risks and uncertainties described in "Non-GAAP Financial Measures," and "Forward-Looking Statements" as well as "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2016 and our Quarterly Reports on Form 10-Q for the quarters ended March 31, 2017 and June 30, 2017.

Non-GAAP Financial Measures

The historical financial information included in this presentation includes financial information that is not presented in accordance with generally accepted accounting principles in the United States ("GAAP"), including net sales excluding FX, EBITDA, Adjusted EBITDA, Free Cash Flow, tax rate, as adjusted, and Net Debt. Management uses these non-GAAP financial measures in the analysis of our financial and operating performance because they assist in the evaluation of underlying trends in our business. Adjusted EBITDA consists of EBITDA adjusted for (i) non-operating income or expense, (ii) the impact of certain non-cash, nonrecurring or other items that are included in net income and EBITDA that we do not consider indicative of our ongoing performance and (iii) certain unusual or nonrecurring items impacting results in a particular period. We believe that making such adjustments provides investors meaningful information to understand our operating results and ability to analyze financial and business trends on a period-to-period basis. Our use of the terms net sales excluding FX, EBITDA, Adjusted EBITDA, Free Cash Flow, tax rate, as adjusted, and Net Debt may differ from that of others in our industry. Net sales excluding FX, EBITDA, Adjusted EBITDA and Free Cash Flow should not be considered as alternatives to net income, operating income or any other performance measures derived in accordance with GAAP as measures of operating performance or operating cash flows or as measures of liquidity. Net sales excluding FX, EBITDA, Adjusted EBITDA, Free Cash Flow, tax rate, as adjusted, and Net Debt have important limitations as analytical tools and should be considered in conjunction with, and not as substitutes for, our results as reported under GAAP. This presentation includes a reconciliation of certain non-GAAP financial measures with the most directly comparable financial measures calculated in accordance with GAAP. Axalta does not provide a reconciliation for non-GAAP estimates for net sales excluding FX, EBITDA, Adjusted EBITDA, Free Cash Flow or tax rate, as adjusted, as reported on a forward-looking basis because the information necessary to calculate a meaningful or accurate estimation of reconciling items is not available without unreasonable effort. For example, such reconciling items include the impact of foreign currency exchange gains or losses, gains or losses that are unusual or nonrecurring in nature, as well as discrete taxable events. We cannot estimate or project those items and they may have a substantial and unpredictable impact on our US GAAP results.

Segment Financial Measures

The primary measure of segment operating performance is Adjusted EBITDA, which is a key metric that is used by management to evaluate business performance in comparison to budgets, forecasts and prior year financial results, providing a measure that management believes reflects Axalta's core operating performance. As we do not measure segment operating performance based on Net Income, a reconciliation of this non-GAAP financial measure with the most directly comparable financial measure calculated in accordance with GAAP is not available.

Defined Terms

All capitalized terms contained within this presentation have been previously defined in our filings with the United States Securities and Exchange Commission.

Diverse Industry Growth Drivers

- **Refinish:** Car parc, miles driven, and collision rates
- **Light Vehicle:** Emerging economies and middle classes; ongoing consumer strength in developed markets
- **Commercial Vehicle:** Global consumer markets expanding; infrastructure growth; professionalized logistics management
- **Industrial:** Global GDP and industrial production; application sophistication with enhanced functionality and durability

Long Term Alignment With Global Growth

Highly Variable Cost Structure & Low Capital Intensity

Variable Cost Structure

- ~45-55% of COGS come from variable raw material inputs
- Utilize temporary labor to enable wage structure flexibility
- Toggle other costs as needed in a downturn, including both variable and semi-fixed

Low Capital Intensity

- Capex at \$136 million is 3.3% of sales, but only 1.2% for maintenance capex
- Batch production process is inherently flexible
- Capacity additions are very modular to minimize stranded cost impacts

Well Positioned to React to Cyclical Downturns

Axalta's Strategy

Grow in existing markets with our industry-leading products and services

Move into attractive adjacencies by leveraging our global technology and service capabilities

Grow in targeted industrial coatings segments via organic growth and selective acquisitions

Focus on operational excellence and foster a culture of accountability

Commentary

Net sales led by acquisition growth

- Net sales pressured by lower volumes in Latin America Refinish and EMEA Light Vehicle, partly offset by solid growth in Industrial and Commercial Vehicle end-markets
- Pricing concessions in Light Vehicle and unfavorable price and product mix in Performance Coatings drove lower net sales in North America and EMEA
- 1.5% unfavorable currency impact shows moderating impact versus prior two years

Return on Invested Capital (ROIC)

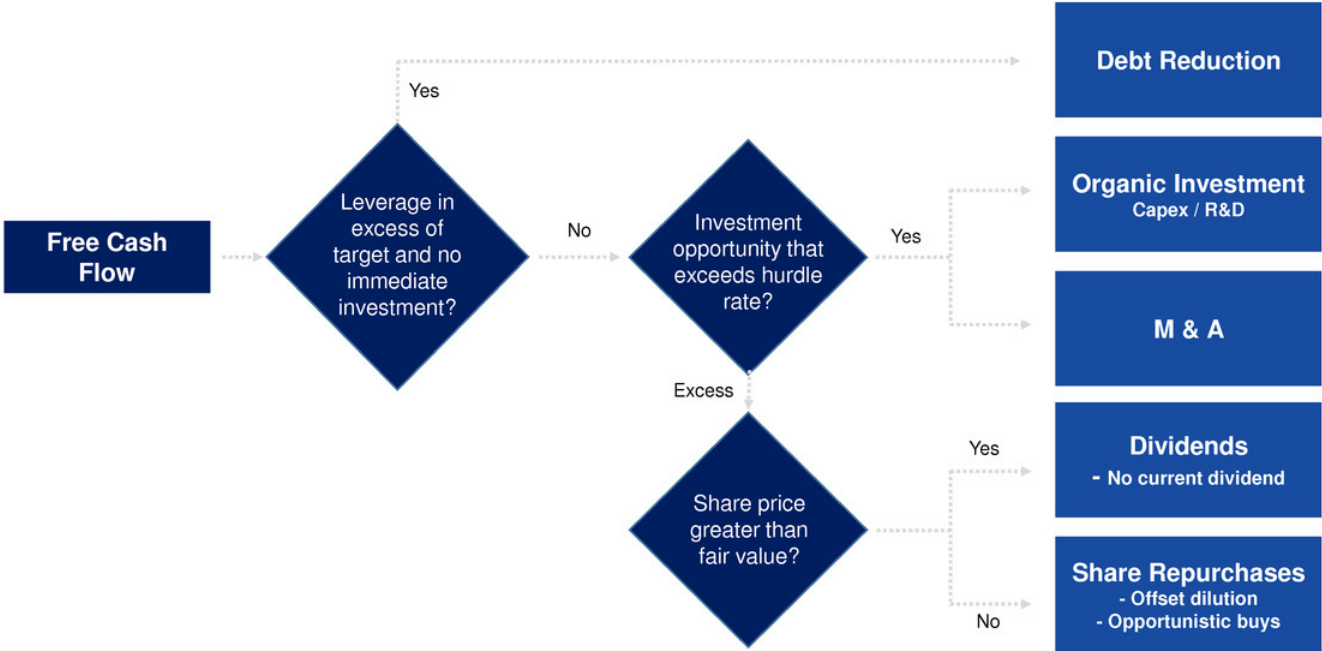

NOPAT ROIC (LTM)

Notes: 1) ROIC = Net Operating Profit After Tax (NOPAT) / (Total Debt + Preferred Stock + Minority Interest + Equity); 2) AXTA total capital excludes identified intangible assets; 3) Data as of LTM Q4 2016

Commentary

- Axalta's ROIC is penalized by the February 2013 LBO and related asset step-up from purchase price accounting
- Drivers of ROIC upside:
 - ✓ Growth in NOPAT from ongoing business execution
 - ✓ Effective capital allocation: Organic investments, return accretive M&A, and focus on asset efficiency
- We believe that over time we can achieve returns in excess of the peer group averages

Comments on Revised Guidance

- Net sales growth includes incremental M&A contribution of 6-7% from completed acquisitions
- Headwinds to margins from input cost inflation, certain pricing and customer mix changes, and foreign currency
- Tax rate, as adjusted, benefits from full year effect of actions completed in mid-2016
- Free cash flow expectation imbeds assumed core working capital improvement year-over-year, with acquisitions offsetting lower organic Adjusted EBITDA
- Interest expense savings from refinancing offset by incremental borrowings to fund recent acquisitions
- D&A increased somewhat from acquisitions

(1) Reflects adoption of ASU 2016-09, which contributed 1.7 million shares of dilution

Industrial Coatings Drivers

Volume growth driven by global GDP and Industrial Production

- China drives >40% of global industrial coatings consumption
- Commercial architectural market has seen ongoing recovery

Coatings suppliers are consolidating

- Consolidation driven by scale advantages and globalization of some end-markets; many niches remain regional and fragmented

Technology innovation is a catalyst for growth

- Drivers include demand for environmentally sustainable products, customer focus on productivity, improved corrosion and wear resistance and enhanced color choices

Customers are globalizing

- Local product must meet global specifications consistently across regions

Global infrastructure growth is driving demand

- High temperature resistance required for energy applications
- Demand for electrical insulation products linked to infrastructure

Growth Priorities & Strategies

Wood

- Expand product line, channel access
- Broaden geographic reach

Agricultural, Construction & Earthmoving Equipment (ACE)

- Expand approval portfolio with multiple coatings technologies
- Utilize global footprint to target new business in all regions

Architectural

- Market our powder coatings to architects (as an environmentally friendly alternative)
- Expand color range to compete with liquid alternatives

Electrical Insulation Systems (EIS)

- Continue to build global capability
- Target sub-segments with above average growth rates

Oil & Gas

- Build on leading technology position for exterior pipe coatings
- Establish strong global network to service end users / specifiers

General Industrial

- Accelerate globalization of key GI sub-segments
- Develop industry leadership in high durability, corrosion – resistant coatings

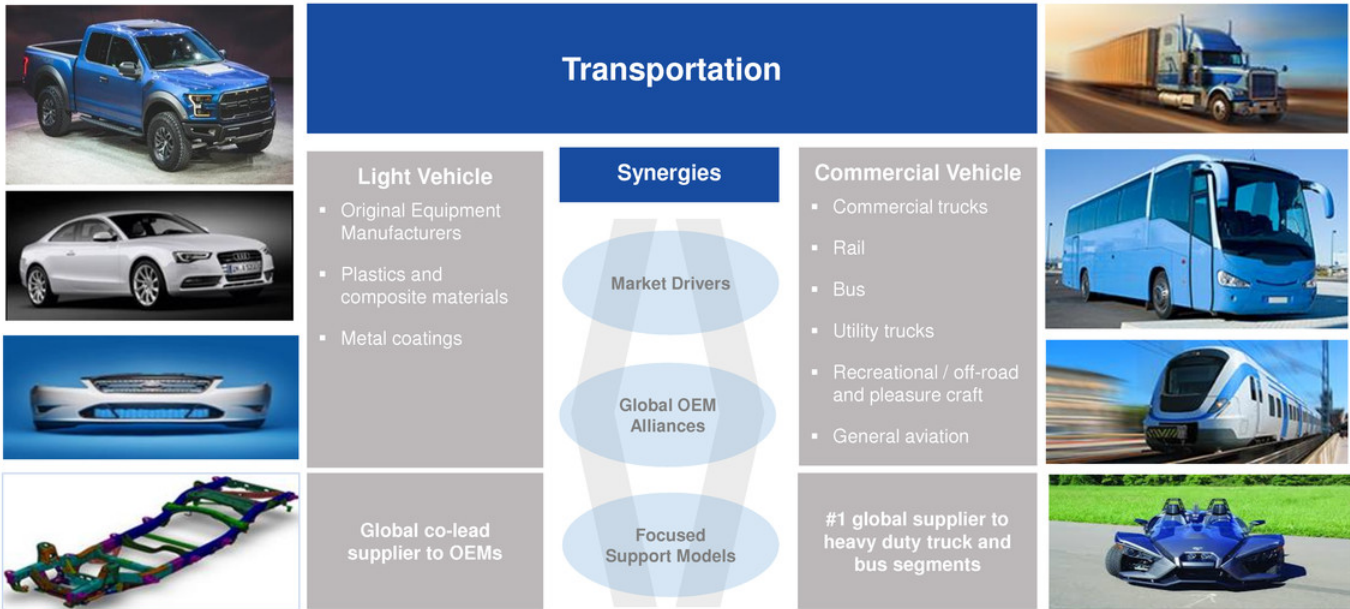

Coil

- A top 4 player in U.S. market
- Focus on value added premium segments where customers value durability and long product life

Transportation Coatings Overview

The global transportation market is projected to grow ~3.4% CAGR through 2019

- Demand drivers include
 - ✓ Global GDP
 - ✓ Vehicle replacement cycles
 - ✓ Growth in emerging markets
 - ✓ Infrastructure spending

Axalta is a leading global OEM coatings provider

- 17% global light vehicle market share with strong OEM relationships in all regions
- #1 player globally in heavy duty truck and bus
- Extensive portfolio of technologies fit for purpose in each market

Axalta is actively transforming its business for profitable growth

- Moved from regional structure to global leadership
- Improved alignment with strategic and underserved customers
- Building capability and footprint in high growth regions
- Expanding global brand strategy

Progress to date has been strong

- Showing results to date through business wins and global launches
- Strong earnings contribution underscores focus on profitable growth
- Capacity investments to support growth in all regions

Adjusted EBITDA Reconciliation (cont'd)

- A. During the year ended December 31, 2016 we amended our Credit Agreement and refinanced our indebtedness, resulting in losses of \$88 million, and prepaid principal on our term loans, resulting in non-cash extinguishment losses of \$10 million. In 2Q 2016, we prepaid \$100 million of the outstanding principal on the 2023 Dollar Term Loans and recorded a non-cash loss on extinguishment of \$2 million. In connection with the refinancing of our Dollar Term Loans during 2Q 2017, we recorded losses of \$12 million. We do not consider these to be indicative of our ongoing operating performance.
- B. Eliminates foreign exchange gains and losses resulting from the remeasurement of assets and liabilities denominated in foreign currencies, net of impacts of our foreign currency instruments used to hedge our balance sheet exposures.
- C. Eliminates the non-cash, non-service cost components of long-term employee benefit costs.
- D. Represents expenses primarily related to employee termination benefits and other employee-related costs associated with our Axalta Way initiatives, which are not considered indicative of our ongoing operating performance.
- E. Represents fees paid to consultants for professional services primarily related to our Axalta Way initiatives, which are not considered indicative of our ongoing operating performance.
- F. Represents integration costs related to the acquisition of the Industrial Wood business that was a carve-out business from Valspar. These amounts are not considered indicative of our ongoing operating performance.
- G. Represents acquisition-related expenses, including changes in the fair value of contingent consideration, as well as costs associated with the 2016 secondary offerings of our common shares by Carlyle, both of which are not considered indicative of our ongoing operating performance.
- H. Represents non-cash costs associated with stock-based compensation.
- I. Represents costs for certain non-operational or non-cash (gains) and losses unrelated to our core business and which we do not consider indicative of ongoing operations, including equity investee dividends, indemnity losses (gains) associated with the Acquisition, losses (gains) on sale and disposal of property, plant and equipment, losses (gains) on the remaining foreign currency derivative instruments and non-cash fair value inventory adjustments associated with our business combinations.
- J. Represents the payment of dividends to our joint venture partners by our consolidated entities that are not wholly owned, which are reflected to show cash operating performance of these entities on Axalta's financial statements.
- K. As a result of currency devaluations in Venezuela, during the year ended December 31, 2016, we recorded non-cash impairment charges relating to a real estate investment for \$11 million and long-lived assets for \$58 million. In conjunction with the deconsolidation of our Venezuelan subsidiary during 2Q 2017, we recorded a loss on deconsolidation of \$71 million. In addition, during 2Q 2017, we recorded non-cash impairment charges related to a manufacturing facility previously announced for closure of \$3 million. We do not consider these to be indicative of our ongoing operating performance.

Thank you!
